1. The following is an examiner's statement of reasons for allowance: Prior art does not disclose single phase motor driving circuit with controller for outputting a control signal to drive a single phase motor in a period in which a saw tooth voltage of a predetermined cycle is larger than a duty setting voltage based on a result of comparing a detected temperature voltage changed based on a temperature detected by a temperature detecting device with a starting duty setting voltage increased with time while a voltage smaller than detected temperature voltage at the time of starting said single phase motor is set as an initial value wherein controller sets duty setting voltage as said starting duty setting voltage when result of comparison shows that starting duty setting voltage is smaller than detected temperature voltage and controller sets duty setting voltage as said detected temperature voltage when said starting duty setting voltage is larger than said detected temperature voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
